#### INTRODUCTION

The Shih-tsui-shan Thermal Power Plant is located on the west bank of the Huang Ho (River) approximately 14 nautical miles south of Shih-tsui-shan, China.

BASIC DESCRIPTION

The plant is rail and road served, coal operated, and secured by a fence.

Between the date of the latest photography used in the referenced report, and an extension was built on the generator hall and boilerhouse, and their combined roof cover was increased by about 40 percent. A stack was constructed to serve the new section. An extension of the control building was also completed during this time.

The older boilerhouse section previously had two stacks with each stack serving one boiler unit. One stack has been removed and the other stack now serves both units.

The spray ponds appeared to be operating on all the referenced imagery.

Both stacks were emitting smoke in not be southern stack in the southern stack in the southern stack in the stacks on poor-quality imagery in
